GUANO GOLD-KWIK START[®]

Tried - Proven - Trusted

Why It Works!

1. Available phosphorus - not locked up ✓
2. 50-50 phosphorus split ✓
3. Phosphorus not water soluble ✓
4. Active calcium availability ✓
5. Directly and indirectly adds organic matter ✓
6. Improves water and nutrient holding capacity ✓
7. Active silicon availability ✓
8. High cation exchange capacity ✓
9. High organic carbon level ✓
10. Acts as soil conditioner ✓

Secondary factors that flow from the above

1. Better metabolism of nitrates in plants
2. More phosphorus over the growing period
3. Stronger cell walls leading to;
 - a. Flavour enhancement
 - b. Resistance to mould and fungus attack
 - c. More upright stems and open leaves
 - d. Enhanced photosynthesis
4. More fertile and viable seed production
5. Increase in soil microfauna
6. Longer shelf life of product
7. Food that is better to eat

Guano Gold[®] Features & Benefits

- Natural Organic product
- Fast and slow release of phosphorus
- High in Cation Exchange Capacity (C.E.C)
- Granulated (2-5mm), easy to handle and spread through all spreaders and combines
- Minimal in cadmium and mercury
- Suitable for blending with most other types of fertilisers
- No odour
- Australian Certified Organic Farm Input 309
- Environmentally freindly

Product Analysis

Phosphorus.....	11.6%
Calcium.....	29.0%
Silica.....	10.0%
Organic Carbon.....	8.6%
C.E.C.....	129Me/100g

Plus a comprehensive range of trace elements. (Refer to extensive technical data reports on our website)

**Available from over 200 authorised
dealers around Australia**
